STRUCTURAL VS.

PIGMENTARY COLOURS Pigmentary and structural colours both contribute to the colouration of birds. Many of the most striking colours are created by a combination of pigmentary and structural colours. THE ANATOMY AND PHYSICS OF AVIAN STRUCTURAL COLOURS - Prum Lab - Lecture 17: Color 1 History of Color You already know that wavelengths of light have different colors. For example, red light has $\lambda \approx 650\text{nm}$, blue light has $\lambda \approx 480\text{nm}$ and purple light has $\lambda \approx 420\text{nm}$. But there is much more to color than pure monochromatic light. For example, why does mixing red paint and blue paint make purple paint? Lecture 17: Color - Harvard University Department of Physics -
